Rebuilding Post-Pandemic Societies: Editorial Section¹

INTRODUCTION

Dated back on December 31, 2019, the World Health Organization (WHO) received a notification of pneumonia disease, whose source was unidentified, in Wuhan, China [1]. Then, the disease which was caused by the SARS-CoV-2 virus was referred by WHO as COVID-19. The COVID-19 was designated by WHO as a pandemic on March 11, 2020 [2]. Furthermore, by January 29, 2021, as many as 102.6 million cases of COVID-19 worldwide with more than 2.2 million deaths have been reported by WHO [3]. Globally, five countries experiencing the highest number of COVID-19 positive cases are the United States, India, Brazil, Russia and Great Britain [3].

The COVID-19 pandemic has caused not only casualties but also opens opportunities, among others are in the fields of technology, education, and health. In the field of technology, we can observe the increasing use of technology for distance or remote education and the utilization of Artificial Intelligence (AI) in various fields including health. In the health sector, technology related to telemedicine and vaccines has also begun to develop. There has also been an expectation that within the post- COVID-19 period, the novel ideas keep developing, and Indonesia can take an active role in developing this.

Regarding the situation, the establishment of the 2021 Indonesian Scholar Scientific Summit (I3S 2021) is expected to serve as a scientific forum for exchanging ideas among scientists, students, and industry practitioners in all relevant fields in order to generate innovative ideas that can be developed in the post-COVID-19 pandemic situation.

Indonesian Scholars Scientific Summit (I3S) 2021 is a scientific conference involving Indonesian scholars who currently work or study in Taiwan and outside of Taiwan, such as Indonesia and other countries. This event is conducted by *Perhimpunan Pelajar Indonesia* (PPI) Taiwan, which is the Overseas Indonesian Student's Association Alliance in Taiwan, in collaboration with *Perhimpunan Pelajar Indonesia Dunia Kawasan* (PPIDK) Asia-Oceania or the Overseas Indonesian Student's Association Alliance for Asia-Oceania Region, who have their annual symposium in 2021. These two associations are referred to as PPI Taiwan and OISAA Asia-Oceania, respectively, throughout this conference.

OBJECTIVES

The joint event of I3S 2021 and the OISAA Asia-Oceania Symposium 2021 is scheduled to be conducted on June 21-27, 2021 and being hosted by PPI Taiwan. The main event is taking place on June 25-27, 2021, which is prompted by four days of pre-event series on June 21-23, 2021.

The objective of this event is to promote the development of scientific ideas from and among the participants and speakers; to disseminate new knowledge to the participants, committees, and speakers; to establish a network among the participants, committees, and speakers; and to increase awareness on current issues related to the conference's theme.
